

## YOU ARE THE NEXT GENERATION FUTURE AUTOMOTIVE EXPERTS»»

Over the last few years, the auto industry lost a lot of expertise due to the recession, downsizing, retirements, and moves to new industries. But now that the industry is recovering, a new crop of professionals is coming in ready and eager to keep the industry moving forward, and AIAG is here to help!

### **What are Future Automotive Expert events?**

AIAG Future Automotive Expert (FAE) events focus on making sure critical industry knowledge is passed from current industry experts to the next generation of experts, so you don't have to learn the right way to do things the hard way...

### **When and Where are FAE events?**

Each month of the year (excluding July and December), senior industry professionals share the invaluable knowledge they've gained through lectures, case studies, interactive panels, or facility tours, followed by networking with the experts and your peers, and refreshments. All events are held in the Southeast Michigan area and are free of charge (No reimbursement paperwork to fill out!).

### **Who should attend?**

Anyone who is new to the automotive industry or their function in the industry (good rule of thumb is 10 years or less in auto).

### **Want to attend an FAE event?**

Register for all events at [www.aiag.org/events](http://www.aiag.org/events)

### **Want a VIP invitation?**

These events do sell out, so have your direct manager send us your information and we will add you to an exclusive invite list that will give you one week advance registration opportunity for every FAE event.

See the back of this flyer for upcoming 2016 FAE events!
