

# CORPORATE RESPONSIBILITY OVERVIEW

AIAG.org

## CORPORATE RESPONSIBILITY

To be successful today, the automotive industry and its supply chain partners must contend with heightened expectations from a range of stakeholders on complex corporate responsibility (CR) issues. The increased globalization of automotive production makes understanding and managing the impact of working conditions on business a greater challenge than ever. At AIAG, we bring our members together and work collaboratively to develop solutions to these challenges, from improving global working conditions and environmental sustainability, to increasing transparency and respect for human rights in the supply chain.

It's the way we started working 35+ years ago, when key players in the industry recognized that taking unified action would reduce complexity, costs and increase efficiency. Today, we use our unique position at the nexus of multiple industries and companies to develop the insights, trainings, conferences and tools our members need to operate responsibly—and profitably.

Improving our corporate responsibility practices is not only the right thing to do, it's good business—and an investment in the future of our industry.

## AIAG CORPORATE RESPONSIBILITY INITIATIVES INCLUDE:

- Industry Guidance and expectations concerning Worker Rights/Human Rights, Environment and Business Ethics
- Resources to develop a Responsible Supply Chain for Conflict Minerals
- A collection of Supply Chain Sustainability eTools to enhance productivity
- Benchmarks to increase Environmental Sustainability
- Information to Manage Chemicals in Products and Production

## HOW WE DO IT

Our corporate responsibility work is guided by a CR Steering Committee, comprised of representatives from Cooper-Standard, Denso, FCA, Ford, General Motors, Honda, Magna, Nissan and Toyota. The Committee, along with CR Advisory and Working Groups:

- Promotes responsible business practices throughout the automotive supply chain
- Provides a legal, neutral industry forum for OEMs and suppliers to collaborate
- Convenes industry stakeholders to develop common solutions
